

# Can agriculture help tackle undernutrition in Afghanistan?

## Pre-workshop and Post-workshop Survey

(A workshop for the students of Afghanistan National Agriculture Science and Technology University on April 19, 2016 at Indian Agricultural Research Institute at New Delhi)

### Pre-workshop Survey

## 2) Can agriculture help tackle undernutrition in Afghanistan?

Yes

Why

for the growing of cereal crops like wheat crop can tackle undernutrition in Afghanistan

Yes Agriculture can help tackle undernutrition in Afghanistan

Yes Agriculture can help malnutrition in Afghanistan

My expectation from this workshop  
This is very useful for us to share our and your experience for developing Agri---

Agriculture will help in removing starvation from Afghanistan <sup>which</sup> is an Agricultural Country.

problem of malnutrition in South Asia which LANSA leading

Importance  
1- 20% are working in agri  
2- to have a healthy society we have to produce good quality Agri-products  
3- it would help to reduce malnutrition.  
4-

May be

Why

it depends on a people and organization who are working for this programme.

- what will can this foundation in the future in Afghanistan  
2. what is your aim in the future for Afgh

① hard working about agriculture  
② healthy society

Human consumption straight or non straight link link with Agriculture if we try and attempt we can solve the

No

Why

# Post-workshop Survey

## EXIT SURVEY

1) Did the workshop meet your expectations? 😊

<u>Yes</u>	<u>Somewhat</u>	<u>Not really</u>

2) What aspects of the workshop were useful to you and your work?

Aspects

- Agri - food Policy making.
- Dietary Diversity.

The major think:

- control our water for agriculture.
- long and short time trainings for farmers.

Yes this workshop was good and it met our expectation. The implementing of long term project and changing the leadership agricultural system may be effective.

Yes  
2- To implement on bus along from provinces  
3- Yes 82% possible  
4- LANSa help with us about nutrition

First of all the information from LANSa and the idea of Agriculture Nutrition.

Yes. I'm good feeling from today workshop. Because the nutrition problems are very important especially in Afghanistan.

The aspects about Afghanistan agriculture development and Lansa work in our country honestly is was useful.

1) it was very good.  
2) yah it is possible.  
3) Lansa should take a master degree program to train our rural agricultural related to our proposal.

inform like the policy method and how we can collect the problem data and we hope it's may be useful.

1) Yes  
2) How to and when to work on nutrition and increasing

### 3) Agriculture for nutrition in Afghanistan – is it possible?

Yes

May be

No

How

Very good presentation  
It was very useful

In fact Agriculture is possible for nutrition in Afghanistan. That working together in agriculture field.

May be: if we determine specific time for food ratio like: fruits, veget., Meat. I think it will be possible.

Agriculture has a key role in removing straws and make a great nutrition chain for public.

Yes agriculture in Afghanistan is possible for nutrition because the base of the nutrition is agriculture in Afghanistan.

3) Yes because 80% of people are working in agriculture so the quality of agriculture would help them their health.

It is possible if first we make plan and train the farmers and train them about the technology and about their implication.

1- Yes  
2- To complementing along term project  
3- Yes because we can 80% possible we can by agriculture and nutrition  
4- LANSAs help with us about nutrition

We have to give general knowledge to people especially farmers.

#### 4) How can LANSA help to support your work in linking agriculture and nutrition in Afghanistan?

We Expect Lansa  
~ To work with us and  
make more training and  
workshops.  
~ LANSA may work with  
Private Sector.

Lansa can support  
Afghanistan  
that they work with  
Afghan Government - Agricul-  
Ministry  
and also train our  
people

in Afghanistan we  
should work on  
Home gardening for  
good nutrition but  
we need for more  
trainings and online participation

1- Lansa should to  
a plan about the Agricul-  
school in village.  
2- short and long term  
training about Afghans  
farmers.

LANSAs have to  
implement some  
project such to  
change the traditional  
agricultural system  
and introduce some  
high value crops

① LANSAs can  
organize short  
courses, cool  
storage infrastructure

① First Thanks From  
The help of LANSAs  
② They should +  
continue their help  
and give training to  
people.

1- Yes  
2- To implementing  
along term project  
3- Yes 82% possible  
4- LANSAs help with  
us about nutrition
