Leveraging Agriculture for Nutrition in South Asia

LEVERAGING AGRICULTURE FOR NUTRITION IN SOUTH ASIA (LANSA) IS A RESEARCH PARTNERSHIP.

We are finding out how agriculture and food-related policies, programmes and interventions can be better designed to improve nutrition.

OUR THREE RESEARCH THEMES

1. ENABLING ENVIRONMENTS FOR NUTRITION

How can agriculture and food systems be better linked to other drivers of nutrition?

2. AGRI-FOOD VALUE CHAINS

How can nutritional impacts be improved in agriculture strategies and food value chains?

3. NUTRITION SENSITIVE AGRICULTURE

How can agriculture interventions be designed to improve nutritional status?

THREE CROSS-CUTTING THEMES

1. GENDER

Women's empowerment and nutrition are closely linked

2. INNOVATION SYSTEMS

Networks that embed new ideas in agriculture are key

3. FRAGILITY

Environmental and political insecurities are considered
